

HP4ALL

HP4ALL will enhance, develop and promote the skills required for high quality, optimised Heat Pump installations within residential/non-residential buildings bringing Europe to the forefront of the climatization sector.

OBJECTIVES

Design Heat Pumps competency & excellence skills framework

Increase the number of skilled workers

Enable end users/clients to demand high quality solutions

Replicate the project at national and EU-level

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 891775
